Abstract

Welcome to the \$PYXIS whitepaper, where we introduce you to a groundbreaking project that merges P2E gaming, Ai, Trading, and a multitude of income streams in the crypto world.

Our ecosystem is full of utility, innovation and we dive deep in each sector to provide the best outcome for our holders and be a project reference on that sector.

Our vision is fueled by the community, and our potential is undeniable.

Join us as we rise to the top in the next bull run!

Introduction

In an era of cryptocurrencies and blockchain technology, \$PYXIS emerges as a pioneer with a mission to address the challenges facing the crypto space. We recognize the need for innovation, security, and inclusivity, and we aim to provide solutions that reshape the crypto landscape.

Our Vision

Our perspective on PYXIS extends well beyond the pursuit of immediate gains and short-term opportunities. We perceive PYXIS as a catalyst for enduring, constructive transformation within the crypto ecosystem and its broader implications.

Our approach is to meticulously develop each utility within the ecosystem independently, aiming to fully optimize its potential on a grand scale. This strategy not only propels the specific sector to new heights but also solidifies PYXIS as a reference point in that domain.

Pyxis

**Pyxis
VENTURES**

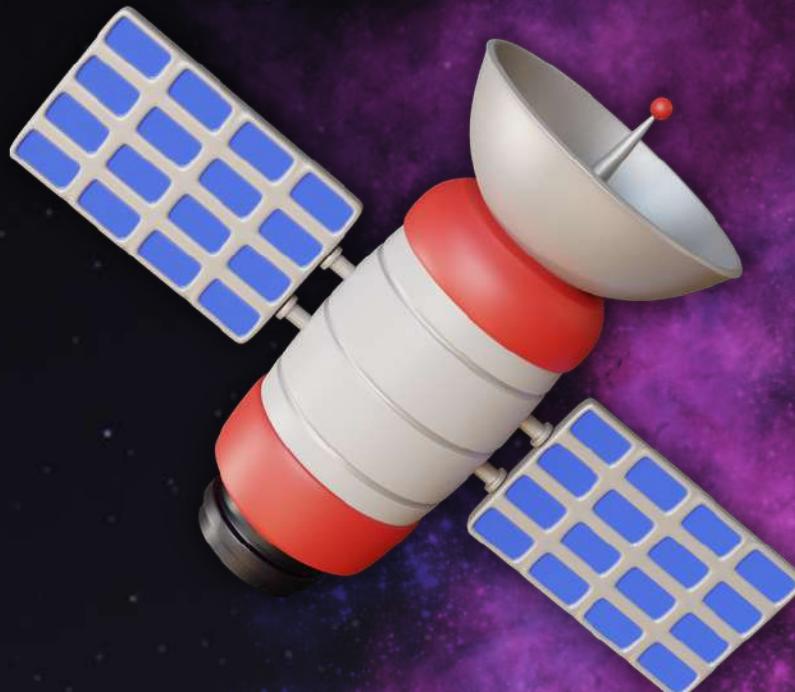

Our Ecosystem

At the heart of the PYXIS ecosystem lies its native token, \$PYXIS, an innovative BASE token issued on the Base Chain.

\$PYXIS can be easily acquired through swaps or purchases on the popular decentralized exchanges (DEX) - After ICO .

In the near future, we are actively working towards establishing partnerships with more centralized exchanges (CEXs) to enhance accessibility and liquidity.

All our utility is based and powered by \$PYXIS.

UTILITY

P2E GAME

\$PYXIS Odyssey offers a captivating space-themed P2E game, where players earn \$PYXIS tokens and exclusive NFTs.

AI MARKET SaaS

\$PYXIS public AI platform offers real-time insights enriched with the analysis of seasoned traders. PRO subscription will revert back to \$PYXIS token holders.

NFT MARKETPLACE

Trade exclusive in-game items, enhance gaming, and thrive in \$PYXIS NFT ecosystem. Multi-currency and much more.

VENTURES

Strategic fund allocation to enhance utility, diversify income streams, and support real-world \$PYXIS applications. Revenue goes to holders.

EVOLVING

At \$PYXIS, we keep pushing our boundaries. We often set additional goals that may not be explicitly outlined in our roadmap, ultimately enhancing utility and driving the project's increased valuation.

Pyxis

Pyxis

INCREASING VALUE

ALL LIQUIDITY GENERATED BY
OUR UTILITY, EVEN FROM NON-
INVESTORS, IS CONVERTED TO
\$PYXIS

IN EACH TRANSACTION, A
PORTION OF THE TRANSACTION IS
PERMANENTLY REVERTED BACK TO
LIQUIDITY DUE TO OUR
TOKENOMICS.

ALL REVENUE GENERATED
THROUGH SPONSORS AND THE
TEAM WILL BE USED TO BUY
BACK \$PYXIS.

WHY HOLD?

At \$PYXIS, we keep pushing our boundaries.

We often set additional goals that may not be explicitly outlined in our roadmap, ultimately enhancing utility and driving the project's increased valuation.

REFLECTIONS

P2E ESPORTS

VENTURES

TRADING SAAS

BUYBACKS

ALWAYS BURNING SYSTEM

Auto Supply Burn

Initially, 50% of \$PYXIS was burned, considering the dead address as a holder, and thus continually reducing the supply through our reflections.

Manual Burns

Our team periodically conducts supply burns, always with the knowledge and involvement of the community. This boosts our scarcity and increases the unit value.

Yield Returns

Our utility enables liquidity from the real world to enter our ecosystem as **buybacks**, thanks to our reflection system. This, in turn, leads to burning.

SCARCITY

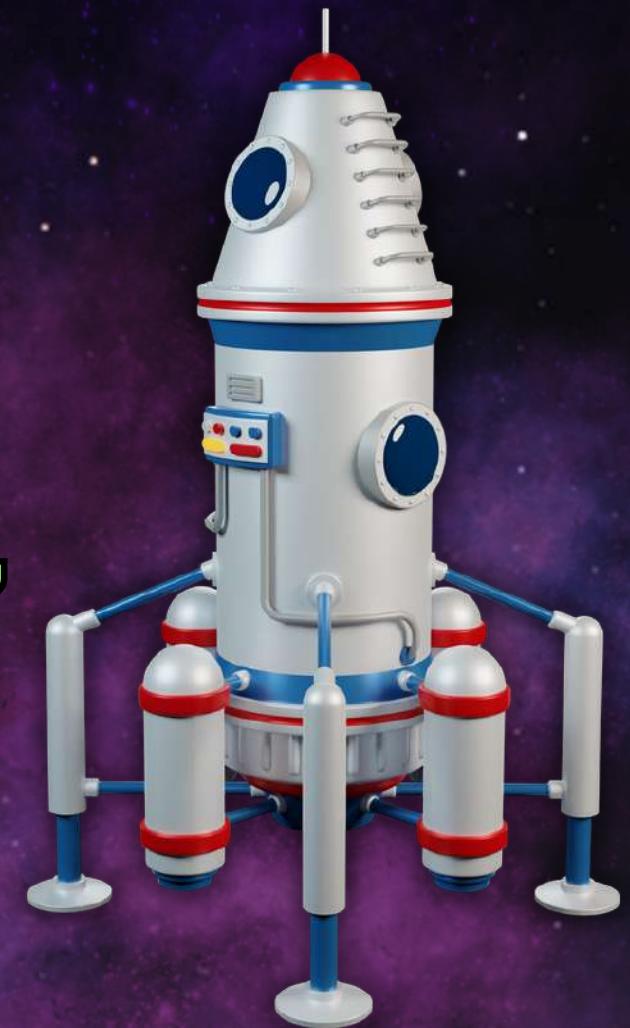

PYXIS is designed to foster the continuous growth of our ecosystem, while maintaining a solid foundation and a strong upward trend.

Liquidity Increases

All buys and sells contribute to the increase in our liquidity through tokenomics, with a portion of it being locked, ensuring the solidity of our ecosystem.

More Liquidity, More Scarcity, Less Supply

Pyxis

Pyxis
VENTURES

TOKENOMICS

2%

REFLECTIONS

2% of every transaction is always returned to our holders, ensuring that every holder continuously earns more \$PYXIS.

2%

LIQUIDITY

2% is added to locked liquidity, fostering the long-term growth and stability of our ecosystem.

3%

GROWTH

Marketing is a vital component of our ecosystem, and this wallet enables our budget to expand, allowing us to increase awareness and exposure.

3%

VENTURES

Ventures play a crucial role in our ecosystem by bringing real-world value through legal investments, thereby injecting fresh liquidity into our ecosystem.

All fees are automatically calculated on every transaction.

When buying or selling PYXYS, please ensure that you set the slippage to 10% otherwise, the transaction will fail.

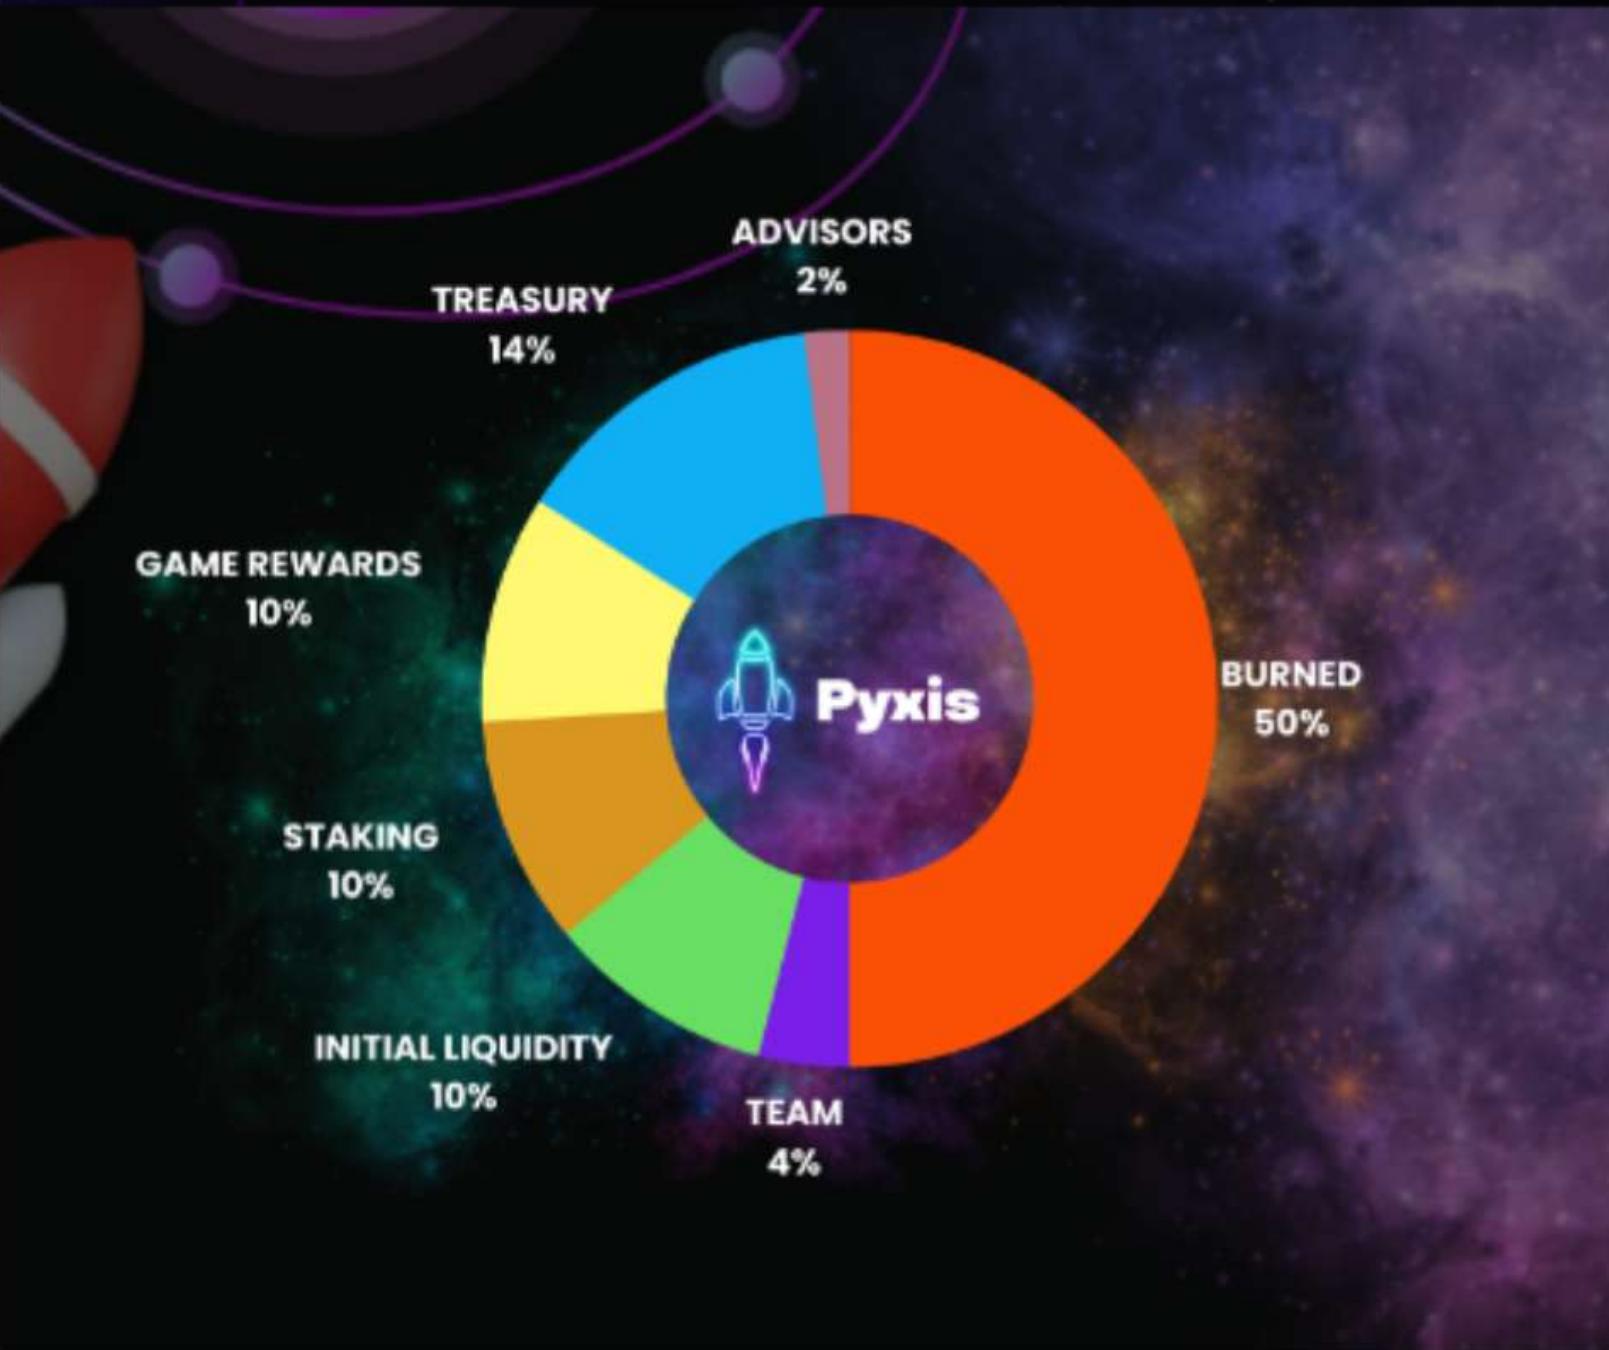

Pyxis

Pyxis
VENTURES

METRICS

We strategically divided the \$PYXIS supply as follows

Pyxis

Pyxis
VENTURES

SAFETY

At \$PYXIS, we take investor safety seriously.
Explore our anti-rug ecosystem with public blockchain transparency.

The image consists of three rectangular cards arranged horizontally, each featuring a different safety feature. The background of the cards is a dark space-themed image with nebulae and stars. Each card has a small Pyxis logo icon at the bottom left and a larger Pyxis Ventures logo icon at the bottom right.

- LIQUIDITY LOCKED ANTI-RUGPULL**
\$PYXIS employs locked liquidity as a vital security measure, safeguarding investors against rug pulls while ensuring our continually stability, growth and trust. Investors are safe.
- SUPPLY LOCKS ONLY BUYERS CAN SELL**
\$PYXIS secures its non-public supply with strict controls, preventing any team influence on price charts and maintaining transparency and trust. We apply public locks.
- NO OWNERSHIP IMMUTABLE**
No functions calls to impact the contract's functionality. This step enhances decentralization, underlining our commitment to transparency and community-driven.

PYXIS ODYSSEY

PLAY-TO-EARN GAME

Pyxis

Pyxis
VENTURES

PYXIS Odyssey

\$PYXIS OFFICIAL P2E GAME.

SYNOPSIS

Welcome to PYXIS Odyssey, an immersive 3D multiplayer first-person space exploration game set in the vast expanse of the cosmos. Players embark on a thrilling journey to explore uncharted planets, mine valuable resources, and discover hidden treasures in a procedurally generated universe.

The game is a continuous development project that currently sits on pre-alpha stage.

The different stages presentation , demos and releases are set on our roadmap.

Pyxis

VENTURES

PYXIS Odyssey

\$PYXIS OFFICIAL P2E GAME.

MONETIZATION

The game is founded on Play-to-Earn principles, ensuring that players not only have fun but also monetize their time spent. This approach also attracts investors, intrigued by the economic aspect.

Within the game, numerous avenues exist to earn \$PYXIS, and we intend to dive deeper into each of these as our ongoing development progresses.

Our goal is to provide comprehensive insights to our holders, ensuring they fully understand these opportunities.

Planetary Resource Mining

Crafting and Trading

Space Battles and PvP Arenas

Discovering Ancient Artifacts

Participating in Special Events

EMBRACE THE FUTURE OF ESPORTS COMBINED WITH CRYPTO

Multiplayer RPG (MMORPG)

Open world

Real-Value Ecosystem

Unique Assets

Assets are tradeable

Players set their own destiny

PYXIS Odyssey

\$PYXIS OFFICIAL P2E GAME.

Exclusive and Rare Items

Hidden throughout the universe are ancient artifacts that hold significant value.

Players who discover these artifacts can either keep them as unique collectibles or sell them in auctions to other players. These auctions are conducted in PYXIS tokens, further integrating the cryptocurrency into the game's economy.

Crafting and Trading

Players can use the resources they've gathered to craft unique and powerful items, such as advanced spaceships, special weapons, or rare cosmetics.

These items can be traded with other players in the game's marketplace, which supports PYXIS tokens as the primary means of exchange.

The scarcity of certain resources and crafted items will influence their value, creating a demand-driven economy.

MONETIZATION

Space Battles and PvP Arenas

PYXIS Odyssey allows players to engage in thrilling space battles and competitive Player vs. Player (PvP) arenas. Players can wager PYXIS tokens on their victories, providing an exciting opportunity for skilled players to earn rewards and for spectators to bet on their favorite players or teams.

Pyxis

Pyxis
VENTURES

PYXIS Odyssey

\$PYXIS OFFICIAL P2E GAME.

Planetary Resource Mining

Within the game, players can mine valuable resources found on various planets. These resources are scarce and unique, and their availability is determined by the game's underlying blockchain system. Players can use their mining equipment to gather these resources, which can be traded, sold, or used to craft valuable items.

MONETIZATION

Sponsored Events and Contests

The game regularly hosts special events where players can compete for exclusive rewards, including rare cosmetics, limited-edition items, and significant amounts of PYXIS tokens.

These events offer opportunities for players to showcase their skills and earn substantial rewards.

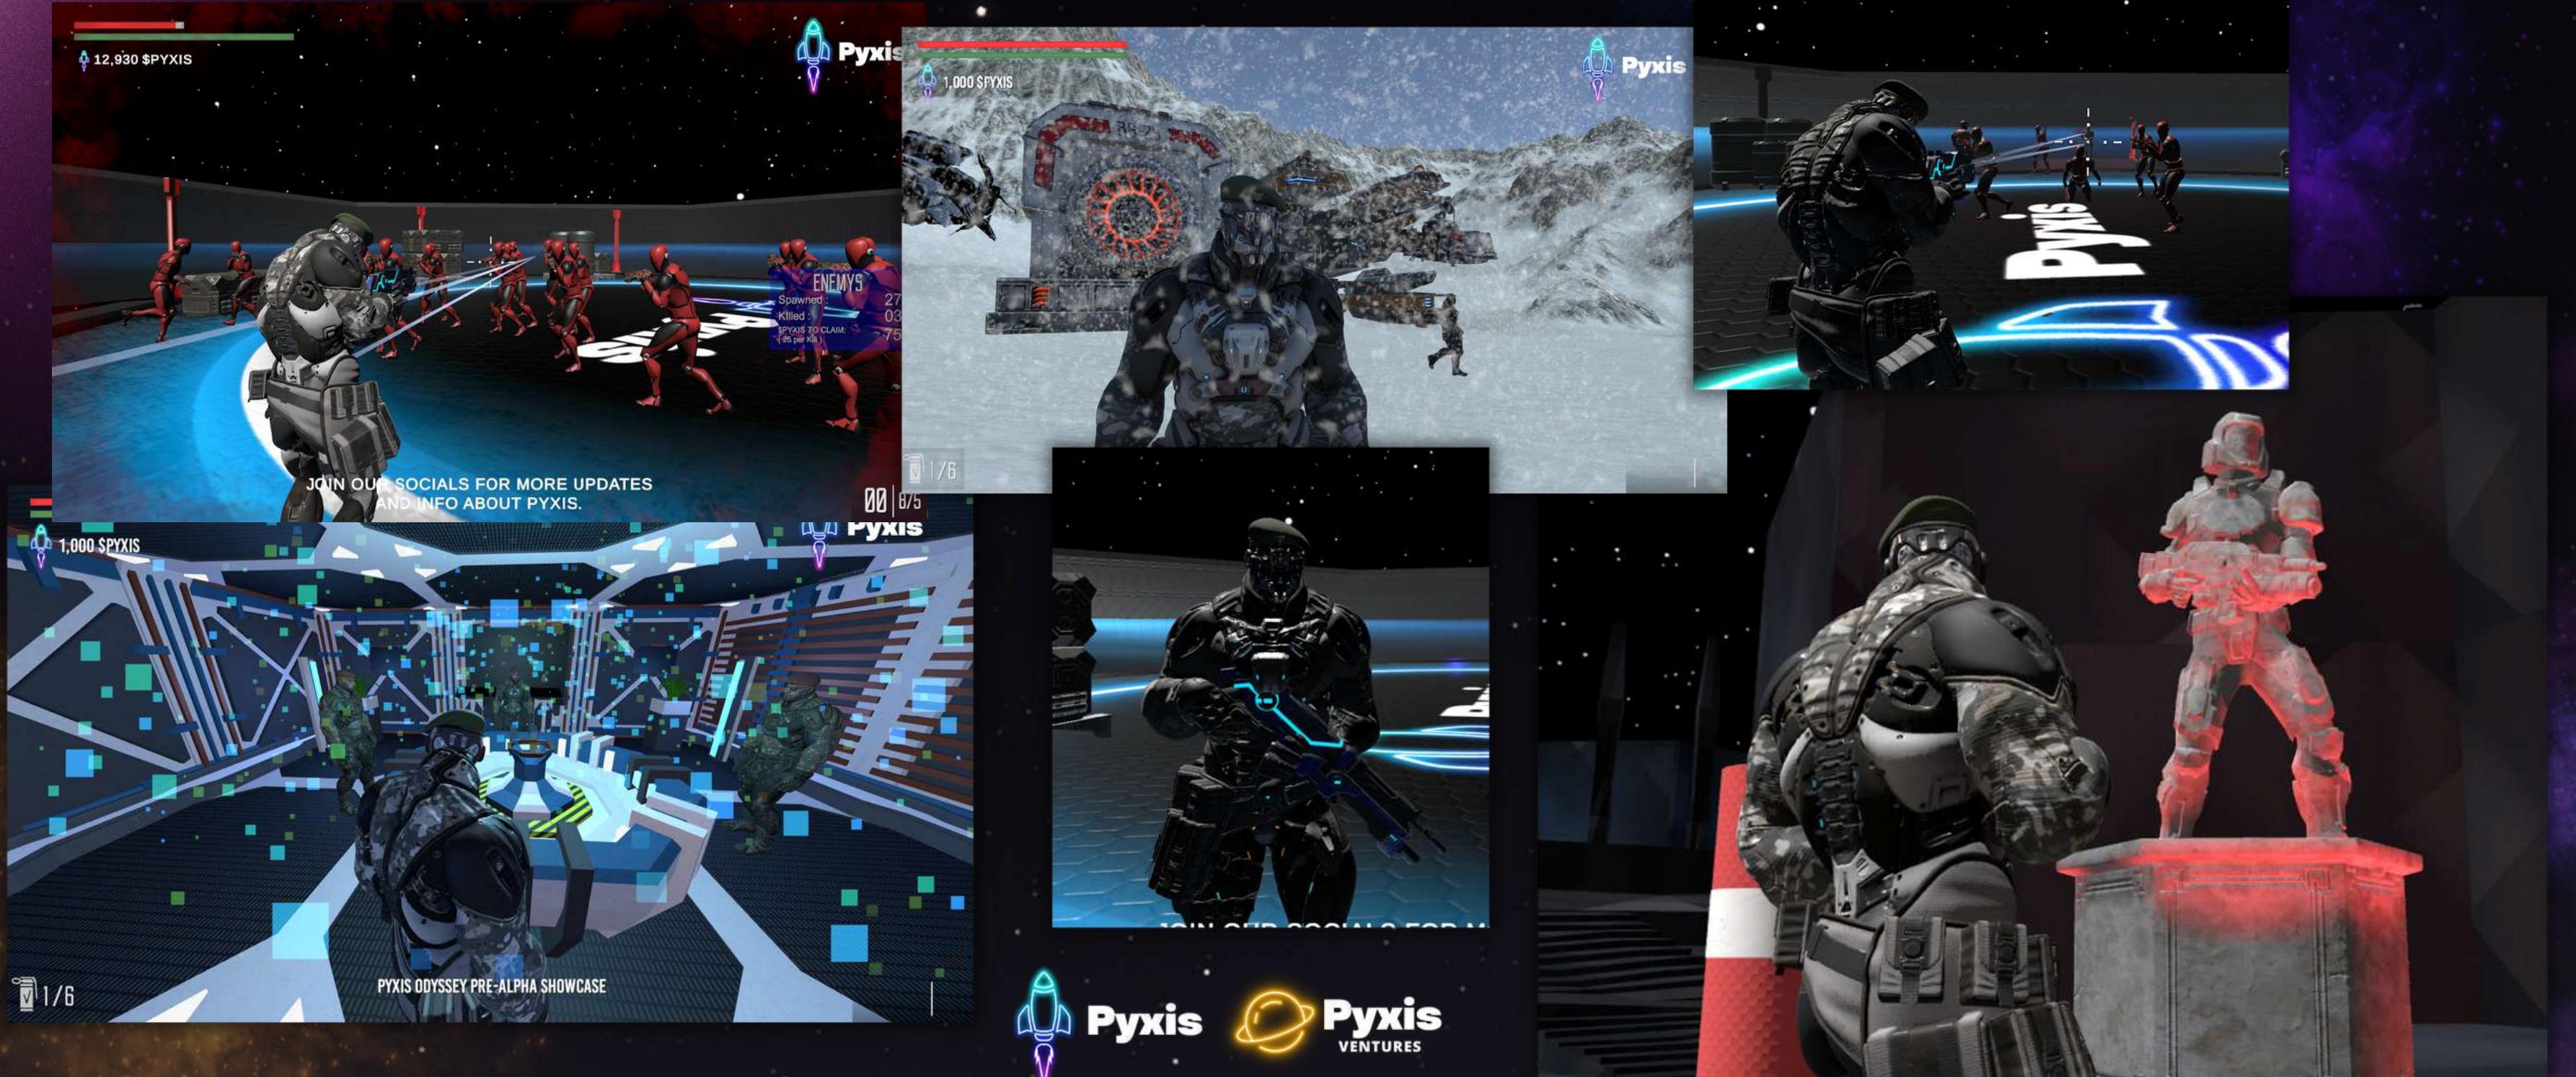

Pyxis

Reshaping Crypto's
Tomorrow.

Our Purpose

At PYXIS, we constantly push our boundaries, striving to introduce more innovation not only into our ecosystem but also into the broader crypto scene.

In this section, we present an innovative approach to the trading scene as a whole, harnessing the power of AI to empower new investors to make informed decisions in the trading market.

With AI-backed trading, risk is minimized, and precision is enhanced. All of these benefits contribute to the growth of our ecosystem, and it's yet another avenue for us to explore while maintaining PYXIS at the forefront of various sectors and industries.

Main Goal

We aim to create a unique platform that embraces the SaaS (Software-as-a-Service) subscription model. This versatile platform can be utilized by anyone interested in trading on both crypto and stock markets.

With a wealth of information, AI analysis, and data-driven decision-making, we offer a comprehensive breakdown of diverse trading options, all backed by publicly monitored data.

While this doesn't guarantee trading success, especially in the highly volatile crypto market, it empowers traders to take less risky approaches and provides them with the knowledge and rationale behind each trade.

It's important to note that all we present are trading options; the final decision to execute a trade rests with the user.

Analysis

For each asset analyzed on the platform, we consult multiple data sources.

LIVE

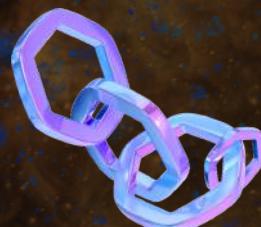

AI LIVE ANALYSIS

Our platform continually monitors assets, providing insights into volume, indicator alerts, and liquidity books.

SOCIAL SENTIMENT

We offer sentiment analysis on trends and assets, providing valuable insights based on community and social awareness.

ON-CHAIN DATA

We provide comprehensive on-chain data analytics, enabling you to make informed decisions based on the latest blockchain data.

TA ANALYSIS

Experienced traders also analyze markets to generate calls based on a combination of data and their own analysis.

Pyxis

Pyxis
VENTURES

Decision Making

At the end of the day, the decision to execute a specific trade rests with the user of the platform.
Our role is to monitor, analyze, and provide trading suggestions based on the data we gather.
Some users may prefer to adopt this low-risk approach without the worry of missing a trading opportunity called by us.
That's why we also introduce trading bots in this context.

Automated Trading

We facilitate automated trading with bots, enabling traders to harness our algorithmic trading strategies and execute trades automatically, 24/7.

SaaS

We aim to ensure that our ecosystem benefits from the platform's growth and also increases in value. To achieve this, we have embraced an innovative business model.

FREE USAGE

Our platform is free to use for any investor tracking the markets. However, some features, such as calls and deep data analysis, are blocked.

PRO FEATURE

The full potential of our SaaS is unlocked with the PRO subscription, requiring users to pay a fee for access to ALL of our functionality.

PYXIS ECOSYSTEM

All profits generated by the PRO features on the AI Platform are reinvested into PYXIS as buybacks, contributing to the growth of our liquidity and value.

Pyxis

Pyxis
VENTURES

Pyxis
VENTURES

ECOSYSTEM BOOST
REAL WORLD LIQUIDITY PROVIDER

Pyxis

Pyxis
VENTURES

Our Purpose

PYXIS Ventures plays a pivotal role in our ecosystem, serving as the allocation and strategic investment hub for our funds. These investments are fueled by the reflections earned through tokenomics and are strategically aimed at strengthening our ecosystem.

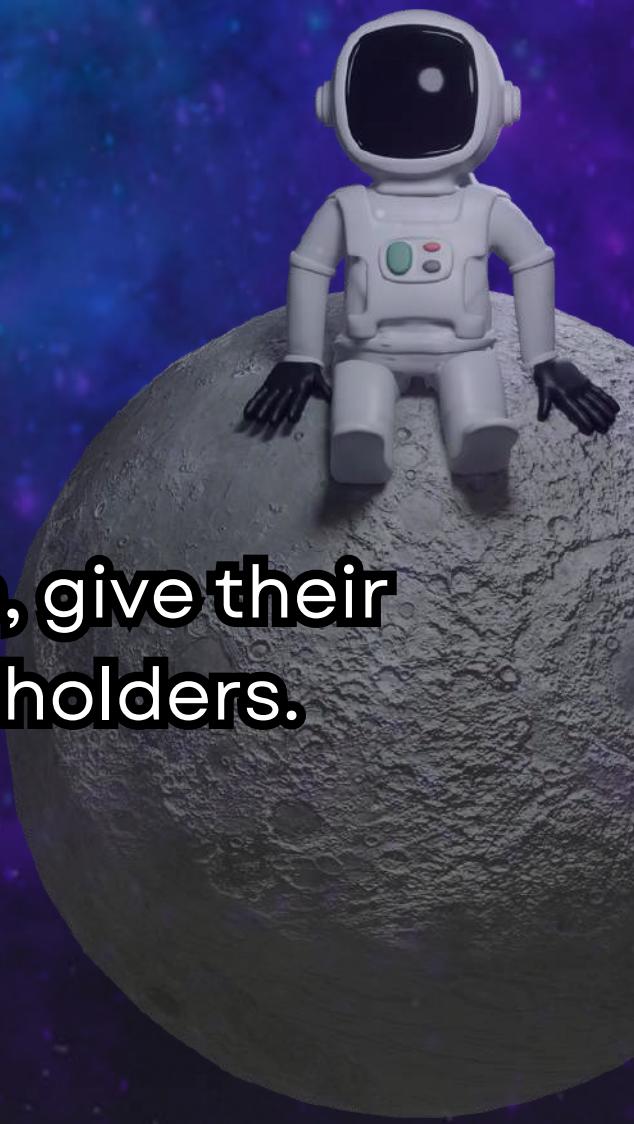

This facet of our ecosystem isn't solely about enhancing utility; it's about broadening income opportunities for our investors, establishing PYXIS as a global brand, and actively contributing to real-world applications of \$PYXIS.

Main Goal

Our ultimate goal is to establish PYXIS Ventures as a legitimate legal entity, aligning with the legal landscape while bridging the gap between crypto and the real world. Our investments, though sporadic, are meticulously chosen, ensuring substantial returns on your investment. With PYXIS Ventures, we're forging a path toward a more robust and versatile ecosystem.

Community

Every idea of investment is gathered with the community and before any progress is made, the community will compare the diverse opportunities, give their opinion and decide which one it's a better solution for our ecosystem and holders. Ultimately, the community decides the investment.

FUNDING

How is funding gathered for the ventures we invest in?

VENTURE REFLECTIONS

Our tokenomics include reflections for the venture wallet, with all the value being used to invest in ventures, ultimately yielding returns to our ecosystem.

NFT COLLECTIONS

To represent our ventures, we create NFT collections that represent assets, enabling crowdfunding that leads to fractional shares.

Pyxis

Pyxis
VENTURES

TYPES OF VENTURE

Our investment ventures can occur in two ways simultaneously.

VENTURE FUND

Ventures made solely by the venture wallet that grows under our tokenomics. A specific goal is set and visible on the website for these funds. Yield results are reverted as buybacks, this benefits ALL holders.

CROWDFUNDING

We create a NFT collection that represents a venture, allows fractional sharing. Venture fund can also help the crowdfunding threshold to be reached. Yield results are reverted to NFT holders, this benefits ONLY investors for that venture.

Pyxis

Pyxis
VENTURES

VENTURE WALLET

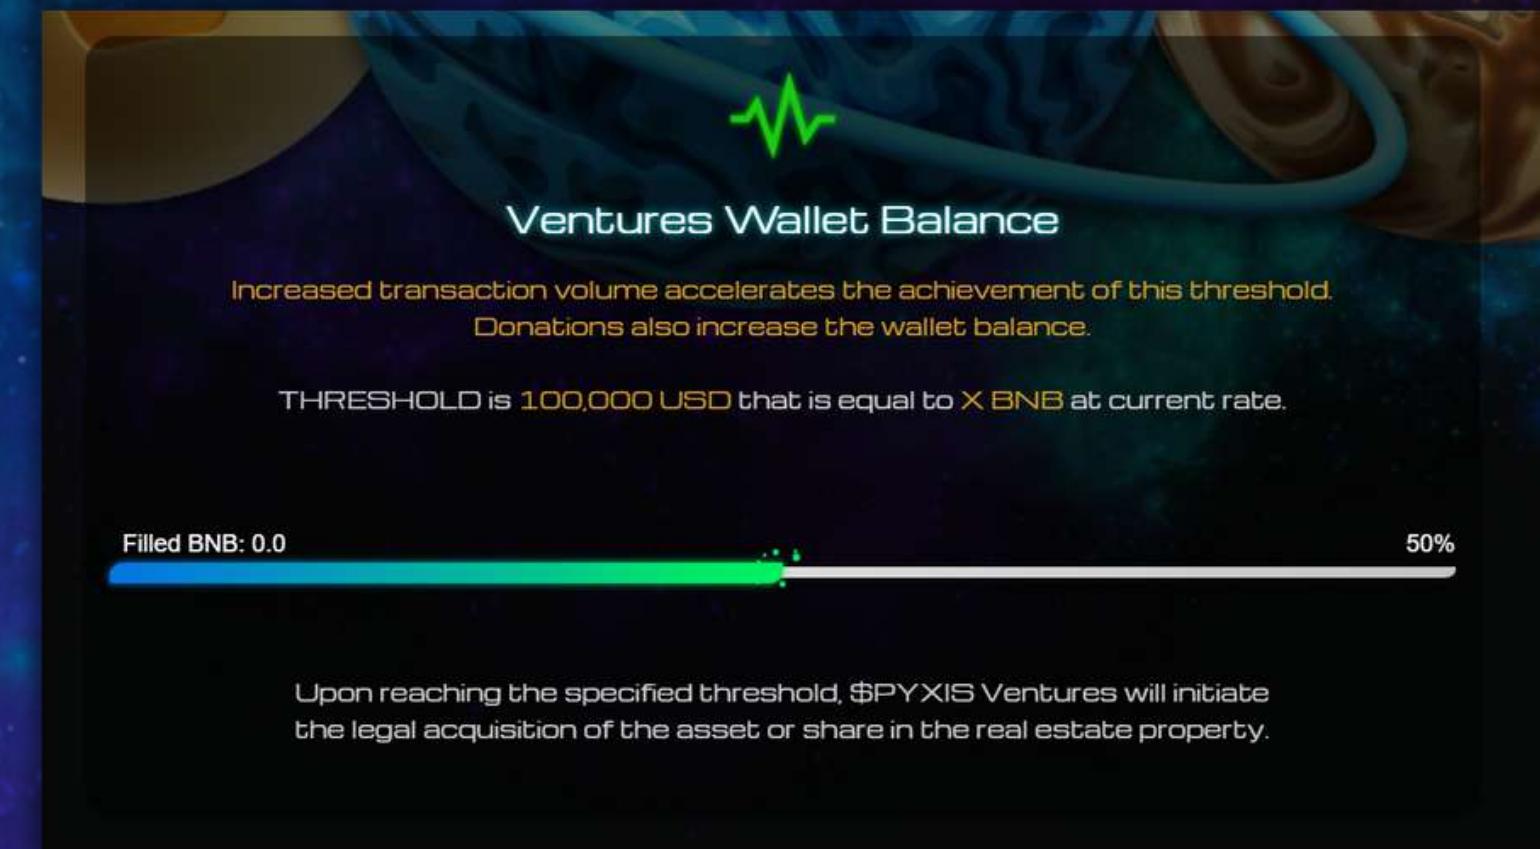

At the core of our tokenomics, reflections also contribute to the venture wallet.

As the volume increases on \$PYXIS, the value of the venture wallet grows.

Our wallet operates by setting a goal with the community,
accumulating value, and monitoring progress.

Once the threshold is reached, the venture is launched.

All progress is trackable on our website.

Pyxis

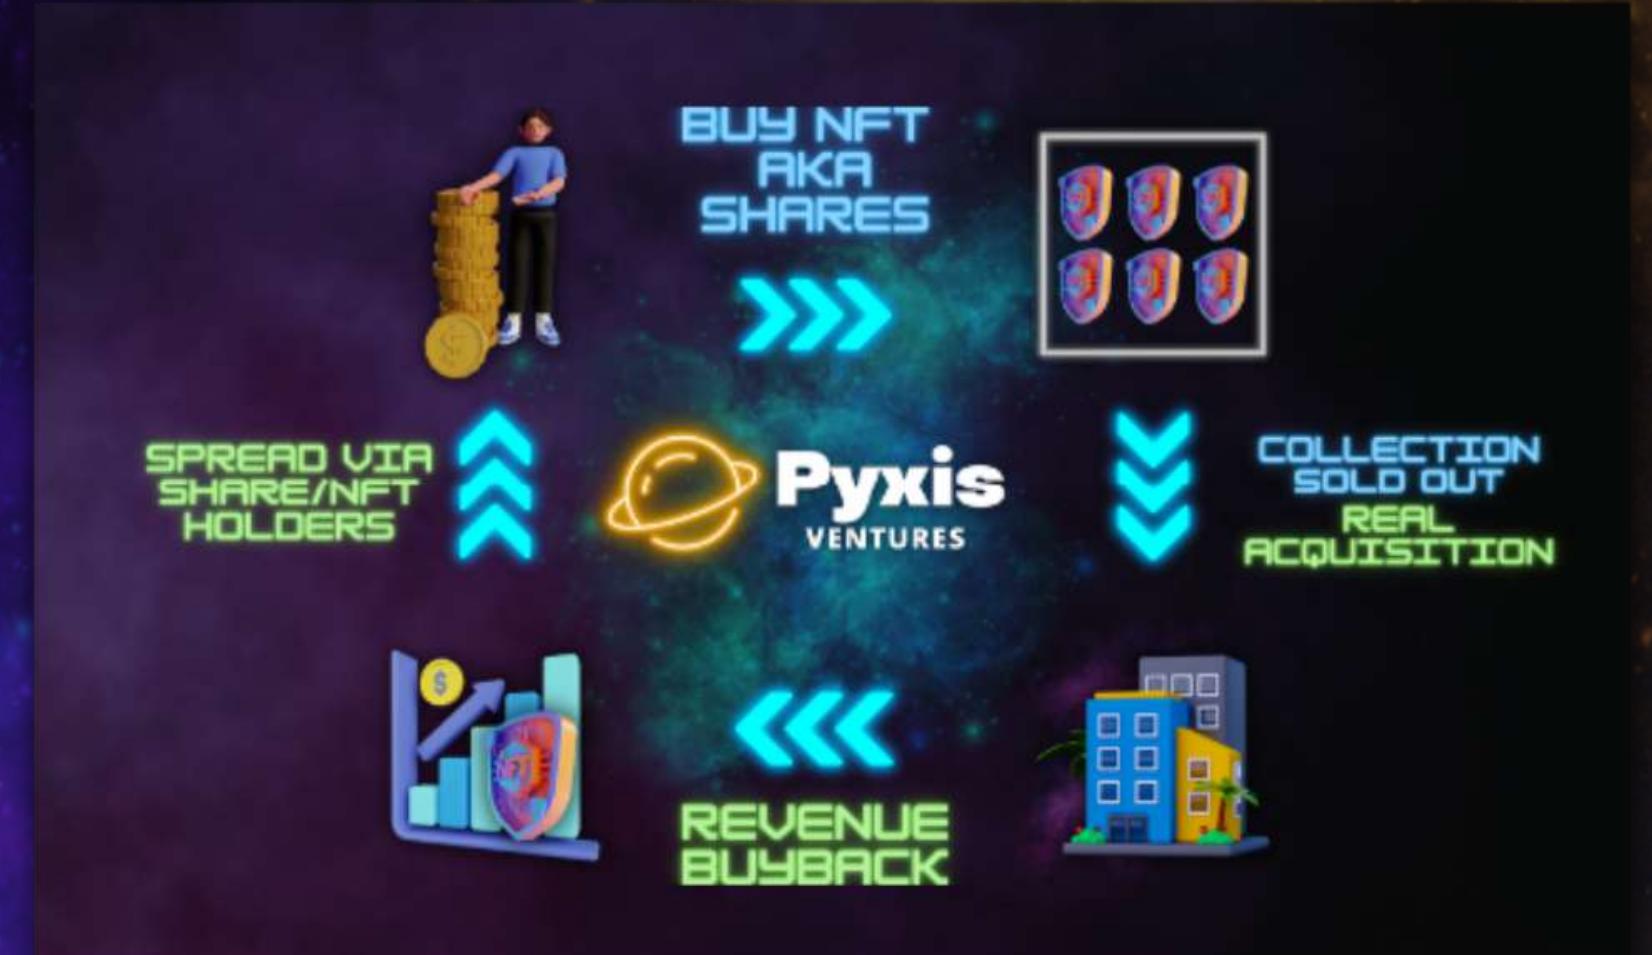

Pyxis
VENTURES

NFT COLLECTIONS

A venture is represented via NFT collections. These NFT collections effectively function as digital proxies for the tangible realassets, enabling fractional ownership for those who invest in the venture.

When the threshold set for that collection is reached, it serves as a trigger for an investment by the \$PYXIS legal entity. All shares of the venture are represented via NFTs inside that particular collection, allowing for yield distribution according to investor shares.

VENTUREA

MERGING REAL ESTATE WITH BLOCKCHAIN

Dates of ventures are set on our roadmap.

VENTURE A

OUR MOTIVATION

Real estate investment has traditionally been reserved for the privileged few with significant capital.

This exclusivity often leaves the majority out of the lucrative real estate market, missing out on opportunities for wealth generation and portfolio diversification.

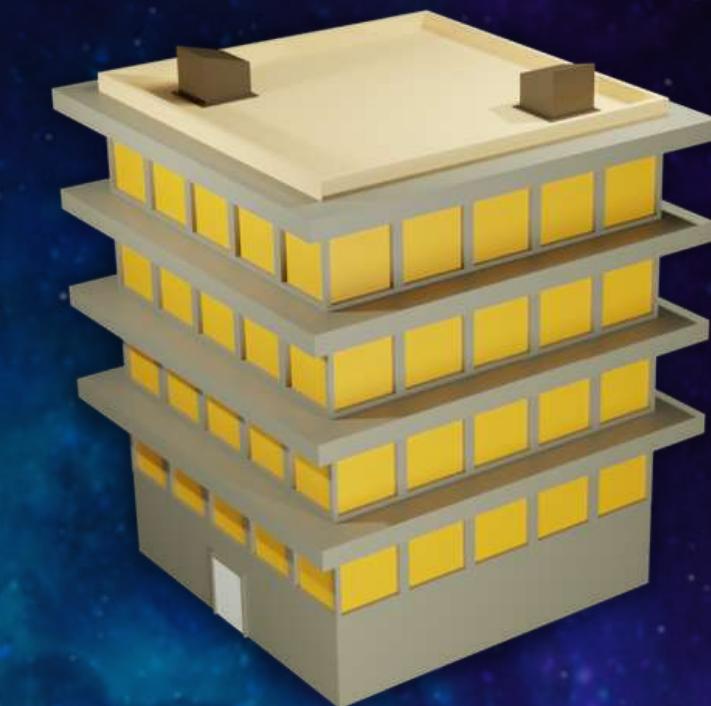

OUR SOLUTION

At \$PYXIS, we're revolutionizing real estate investment by bringing it within reach of everyone.

No longer restricted by financial barriers, anyone can participate in real estate investments and diversify their portfolios. All powered by our ecosystem alone.

VENTURE A

HOW DOES IT WORKS?

\$PYXIS token holders initiate their journey by investing in a unique NFT collection that exclusively represents a particular property.

These NFT collections effectively serve as digital proxies for the real estate assets, allowing for fractional ownership.

Within these NFT collections, traditional shares represent distinct NFTs, essentially acting as a gateway to the assets within that collection. When the threshold set for that property is reached, it serves as a trigger for an investment by the \$PYXIS legal entity.

This investment aims to secure ownership of the property or a percentage of it, effectively integrating the real estate into the \$PYXIS ecosystem.

VENTURE A

HOW DOES IT WORKS?

With the property now under the umbrella of \$PYXIS, the profits generated by the real estate venture flow into the coffers of the \$PYXIS legal entity. These profits are subsequently distributed in alignment with the ownership of NFTs, often referred to as shares, within the collection. This means that as an NFT holder representing a share in the collection, you'll receive a portion of the profits commensurate with your ownership stake.

This process ultimately leads to property acquisition by the \$PYXIS legal entity, profit distribution to NFT owners, and the opportunity for NFT trading and swapping on our dedicated marketplace.
